Week 12 Prove Acorn Project Status

Discuss the principles that we have covered so far in class and how they have related to your Acorn Projects, namely:

Teamwork, Influence, Professionalism, Personality, Pressure, Motivation.

1. Teamwork: Jacob and I tag teamed the presentation like we were two professional ping pong players, haha.
2. Influence: Learning about how we can simplify problems in our lives influenced Steven to put that into practice.
3. Professionalism: Steven was greatly influenced by Jacob to be more professional in the sense of taking out unnecessary details.
4. Pressure: We all have felt the pressure of life get to us this semester.
5. Personality: We learned that different personalities can contribute to a successful team. As long as the desire to be successful is present.
6. Motivation: Besides getting a bad grade, the motivation to push onward has been greatly provided by the hard work of our other team mates.

Meetings

- Meeting Minutes:
 - We met for about 3 hours this week.
- Attendees
 - Anna, Jacob, Steven & Tanner
